

# draft Registration Reports (dRRs) and CADDY services from TSGE

## **draft Registration Reports (dRRs)**

Since October 2010, submissions to lead Member State competent authorities for plant protection products containing substances in Annex I need to be prepared in accordance with the draft Registration Report format (dRR) as described in the Guideline SANCO/6895/2009 rev. 1 of 02.10.2009. This dRR format presents the information that used to be contained in the summary dossier in documents A to G, J, L-III, M-III and N and is now the uniform reporting format for the evaluation for all plant protection products in the European Union. Furthermore, some Member States have additional national risk assessment requirements that need to be met with addenda to the dRR.

## **Using electronic applications (CADDY) to submit your dRR**

Several Member States, the European Food Safety Authority (EFSA) and the Commission request that the dRR be submitted in electronic form. Other authorities such as the CRD accept CADDY but it is not obligatory. However to speed up the procedure, it is advised to compile the dRR in accordance with the Format Specifications for CADDY Document Interchange Format for Pesticides Registration Applications. Some Rapporteur Member States will check the format of electronic submissions to ensure that they comply with the CADDY format so it is in the best interest of the applicant to avoid delays with reviewing authorities to use CADDY applications.

## **How TSGE can support you**

**With a long and successful history in plant protection regulatory affairs, TSGE's team of scientific and registration specialists are actively engaged in obtaining and defending product registrations across Europe.**

**We are at the forefront in compiling and submitting dossiers for authorisation, providing an efficient and reactive service in preparing dRRs, CADDY 2.0 and CADDY xml with Plantos 3.0.**

**We also provide support with any required supplements to existing dossiers such as preparation of specific national addenda or zonal BADs.**
